

Offer cash incentives

to your customers and build your business with the NYS Clean Heat Program.

Incentives and rebates available:

Space heating incentives

Technology	Non-DAC		DAC	
	Single Family	Apartment or Single Family Home < 1,000 sq. ft.	Single Family	Apartment or Single Family Home < 1,000 sq. ft.
Category 2 – ccASHP: Residential Full Load Heating	\$6,000	\$3,000	\$6,000	\$4,000
Category 2b – ccASHP: Residential Full Load Heating with Decommissioning	\$10,000	\$5,000	\$10,000	\$6,000
Category 3 – GSHP: Residential Full Load Heating (Retrofit)	\$17,000	\$7,000	\$18,000	\$8,000
Category 3 – GSHP: Residential Full Load Heating (New Construction)	\$10,000	\$5,000	\$11,000	\$6,000
Category 4 – Partial to Full Load	\$3,000	\$1,000	\$3,000	\$1,000

Water heating incentives

	\$/Unit	Distributor Incentive Amount	Installer Incentive Amount
Category 5 – Downstream Domestic Water Heating ¹	\$1,250	N/A	N/A
Category 5a – Midstream HPWH	\$1,250	\$50	\$50
Category 5b – GSHP Desuperheater	\$100	N/A	N/A

¹ Projects installing equipment to provide domestic hot water heating, either a HPWH or as part of a system that supports space and water heating, as in a water-to-water heat pump associated with a GSHP system or certain air-to-water configurations.

Save your customers money while earning some for yourself!

Here's how to apply for category 2, 2b, 3, 4, 5, 5a and 5b incentives:

- Fill out the form located at nystatewidecmp.customerapplication.com.
- Receive a list of eligible equipment and a buying guide to help you explain the benefits of eligible equipment to customers.
- Purchase approved equipment.
- Install qualified equipment for an RG&E customer.
- Submit projects on the NYS Clean Heat Program online portal.

Incentive amounts

There are four incentive rates offered for each space heating category, differentiated by projects in single-family homes and apartments and by location in or outside a Disadvantaged Community (DAC). These are summarized in the utility incentive tables in the program manual.

Projects in DACs are eligible to receive incentives that cover up to 85% of project costs, while incentives for projects outside of DACs are capped at 70% of project costs. Contractors can determine whether a project is in a DAC by searching the address at nyscrda.ny.gov/ny/Disadvantaged-Communities.

Water heating incentives

The NYS Clean Heat Program offers three categories of water heating incentives: Category 5 – Downstream Domestic Water Heating, Category 5a – Midstream HPWH, and Category 5b – GSHP Desuperheater.

Category 5a is a pass-through incentive program with incentives paid on a per-HPWH basis. When a distributor applies for incentives in Category 5a, the incentive includes a customer incentive, a distributor incentive and a contractor incentive. Distributors *must* provide the noted incentive amount as either a point-of-sale discount or as a credit to the installing contractor's account once payment is received by the Implementation Contractor. When a customer applies for a Category 5a incentive, they are eligible to receive the \$/unit.

Category 5b are installed as integrated components in an eligible GSHP: Residential Full Load Heating project as defined in the program manual.
