

It Pays to Participate

Earn incentives on air-source heat pump and heat pump water heater technology, and build your business with the NYS Clean Heat Program.

Here's How:

1. Enroll as an NYS Clean Heat Participating Contractor at nystatewidecmp.customerapplication.com.
2. Select and purchase eligible equipment depending on your customer's needs and Manual J calculations.
3. Identify available incentives based on dwelling type and category from the tables below.
4. Install eligible equipment for a Central Hudson Gas & Electric customer. See eligibility requirements on back.
5. Submit projects on the NYS Clean Heat Program [online portal](https://cleanheat.ny.gov) and get paid!

Learn more at cleanheat.ny.gov/contractors.

Customer Rebates and Contractor Rewards Available

Category	Project Type	Dwelling Type			
		Single Family		Apartment or Single Family Home < 1,000 Sq. Ft.	
		Base	Wx Tier	Base	Wx Tier
2	ccASHP: Full load heating	\$4,000	\$8,000	\$2,000	\$4,000
2B	ccASHP: Full load heating with decommissioning	\$7,000	\$12,000	\$3,500	\$6,000
3	GSHP: Full load heating (retrofit)	\$15,000	\$20,000	\$7,500	\$10,000
3	GSHP: Full load heating (new construction)	N/A	\$8,000	N/A	\$4,000
4	ccASHP: Partial to full load heating	\$3,000	N/A	\$1,500	N/A

Category	Project Type	\$/Unit
5	Domestic water heating	\$1,250
5B	Geothermal desuperheater	\$100

Save your customers money while earning some for yourself!

List of Eligible Equipment

Category	Eligible Technologies	Eligibility Requirements
2	Mini-split heat pump (MSHP), central ccASHP with air-to-water heat pump (AWHP)	- Each unit in system must be on the NEEP Product List. Eligible AWHP must be on the NYS Clean Heat AWHP QPL. - Eligible building types include single-family residential and projects including one to four apartments. This form is not for projects containing five or more apartment dwelling units. - New construction projects are ineligible. - Each dwelling unit must be separately metered and comply with all applicable laws and regulations regarding dwelling units. - Systems sized for > 120% BHL may incur further review and require justification.
2B	MSHP; central ccASHP; AWHP, for space conditioning with decommissioning	- Eligible projects include any heat pumps that meet the full building load where the previously existing fossil fuel system is decommissioned. - Retrofit projects are eligible; new construction and gut rehabs are not eligible. - Requires submission of a decommissioning checklist, which can be found on the Contractor Resources website.¹
3	Ground-source heat pump (GSHP): full load space heating, retrofit and new construction	- Each heat pump in the system must meet or exceed the ENERGY STAR® geothermal heat pump specification. - Console units and non-console heat pump appliances with less than 24,000 Btu/h rated full load cooling whose performance does not meet or exceed ENERGY STAR specifications must apply for incentives under Category 4. - Ground-source variable refrigerant flow heat pumps (GSVRFs) are eligible for incentives in Category 3 and must meet the efficiency criteria outlined in 3.1.2.1 of the program manual. - Only closed-loop systems are eligible. Open-loop systems are ineligible. - Systems sized for > 120% BHL may incur further review and require justification. - Projects must be sized to meet at least 100% of the load of the project scope at design conditions and serve at least 80% of the building's total square footage. - Each dwelling unit must be separately metered and comply with all applicable laws and regulations regarding dwelling units.
4	ccASHP: partial to full load heating	- The existing partial load heat pump system and the newly installed system elements must meet the eligibility requirements in Category 2. - The new equipment must satisfy greater than 50% of the total BHL at design conditions. - The combination of the existing partial load cold climate heat pump and the new installation primary heat pump system must meet full load requirements as outlined in Section 3.2.
5	Residential rated heat pump water heater (HPWH) and dedicated water-to-water heat pump (WWHP) systems	- HPWHs with Uniform Energy Factor (UEF) rating must meet or exceed ENERGY STAR residential water heater specification. - WWHP can be integrated into an eligible GSHP system as a dedicated WWHP or combined with space heating, meeting or exceeding ENERGY STAR geothermal specifications. Must meet 100% of water-heating load.
5B	Geothermal desuperheater	Installed as integrated component in an eligible GSHP.

¹ The Decommissioning Checklist can be found under the "Air-Source Heat Pump" menu on the NYS Clean Heat Contractor Resources page (cleanheat.ny.gov/contractor-resources).
